ANTELOPE GENIE 2

Knowledge-Driven Agentic AI Excellence

ANTELOPE GENIE 2

Antelope Genie 2 harnesses advanced Agentic AI to deliver intelligent document analysis and seamless data integration. This revolutionary system provides precise responses while connecting multiple data sources, transforming workflows across industries and ushering in a new era of smart automation.

Create Visual Databases Enhance AI Utilization

Antelope Genie 2's database extracts information from client documents, enterprise systems, and web search results to deliver comprehensive business intelligence.

Client Documents

Users can flexibly create multiple securely encrypted databases from internal files, significantly enhancing data security and reducing corporate secret leakage risks. This enables customized data management that protects sensitive information while providing real-time updates and integrated multi-source data for accurate decision-making support.

System Data Integration

The platform employs Model Context Protocol (MCP) to seamlessly connect with enterprise systems (ERP, HR, accounting, etc.). This protocol standardizes connections, overcoming traditional API limitations while enabling real-time bidirectional communication to expand AI operational capabilities.

Web Intelligence

Antelope Genie 2 extracts the most relevant web information to enrich its knowledge base beyond internal resources. Smart algorithms automatically filter and verify online data, ensuring reliability while providing comprehensive perspectives for better decisions. Continuous web monitoring guarantees access to the latest market information, strengthening competitive advantage.

Structured Knowledge Processing

The system builds detailed knowledge graphs that map document relationships, enabling deep contextual understanding. When answering queries, Antelope Genie 2 delivers evidence-based analysis while minimizing plausible but inaccurate responses, significantly improving trustworthiness and eliminating verification needs.

EMPOWER AI SALES ADVISORY

Simply input client needs in natural language, and Antelope Genie 2 instantly generates responses by analyzing your database. It displays insights through clear charts showing supplier comparisons, competitive advantages, and client-focused recommendations. The system can also produce detailed proposal reports on demand, streamlining your sales process from initial query to finalized solution.

The screenshot displays a chat interface on the left with a search bar and a list of chat items including 'Sales Proposal', 'Find all candidate for...', 'A6 Tech Support', 'What domain should L...', 'HR Candidate Selection', and 'Company Finance An...'. The main area shows a 'Sales Proposal' chat window with a table of specifications and a bar chart titled 'Vendor Performance Comparison by Category'.

Multi-language Support	English + Traditional Chinese	English only	English only	Limited language support
Copy Function Customization	Advanced scan-to-print features	Standard copy functions	Standard copy functions	Basic copy only
Web-based Administration	Full web portal with cost control	Limited web access	No web interface	Basic administration
Hardware Requirements	Dedicated kiosk + integrated reader	Standard setup	Basic configuration	Minimal hardware
Maintenance Support	Comprehensive (9:30 AM - 6:00 PM weekdays)	Standard business hours	Limited support	Reactive support only
Transaction Data Management	Automated download + provider integration	Manual processes required	Basic data handling	Limited data management
Data Protection Compliance	Full policy implementation + training	Standard compliance	Basic compliance	Minimal protection measures

The bar chart shows performance scores for Vendor A, Vendor B, Vendor C, and Vendor D across five categories: Hardware, Software, Support, Integration, and Security. Vendor A consistently shows the highest performance scores across most categories.

FLAWLESS FINANCE AT FULL SPEED

Antelope Genie 2 automates Three-Way Matching, comparing purchase, improving accuracy while reducing manual errors. This AP/AR orders, delivery notes, and invoices. It flags discrepancies instantly, automation cuts administrative costs significantly, freeing resources for core business activities.

AUTOMATE HR RECRUITMENT FLOW

Antelope Genie 2 automates the entire recruitment process from resume screening to onboarding. Its intelligent system evaluates candidates, schedules interviews, and integrates with HR platforms, reducing hiring time by 50% while improving accuracy. This allows HR teams to focus on strategic talent initiatives.

The screenshot displays a chat interface on the left with a search bar and a list of chat items including 'Sales Proposal', 'Find candidate for Fu...', 'A6 Tech Support', 'What domain should L...', 'HR Candidate Selection', and 'Company Finance An...'. The main area shows a 'Find candidate for Full Stack Developer' chat window with a text-based response and a 'Candidate Comparison Table'.

Find all candidate for Full Stack Developer, Salary Range = 35000 to 40000, Availability = Immediate, Education = Degree, Other Requirements = JavaScript, React JS, Node JS, Python, MongoDB, MySQL. Compare candidate abilities by comparison table and bar chart, and Radar Chart. And the chart is different in color for different candidates. Finally, suggest which candidates are suitable, name only.

AI2 Assistant

Based on my analysis of the knowledge base, I found several Full Stack Developer candidates that meet your specific criteria. Let me identify the candidates who match your requirements and create the comparison analysis.

Candidates Meeting Your Criteria

From the available candidate data, I found 4 candidates who meet your criteria for Full Stack Developer position with salary range 35,000-40,000, immediate availability, degree education, and the required technology stack:

Qualified Candidates:

- Ryan Lee - HKD 37,000 salary, immediate availability, degree, matching tech stack.
- Alex Wong - HKD 38,000 salary, immediate availability, degree, matching tech stack.
- Chen Wei Lin - Experience with MERN stack, immediate availability, degree.
- Samuel Tan - Python/Vue.js developer, immediate availability, degree.

Candidate Comparison Table

Candidate	Salary (Monthly)	Experience	JavaScript	React.js	Node.js	Python	MySQL	MongoDB	Firebase	Education	Availability
Ryan Lee	HKD 37,000	3 years	Advanced	Advanced	Advanced	Intermediate	Advanced	Intermediate	Basic	Degree (BIT)	Immediate
Alex Wong	HKD 38,000	7 years	Advanced	Advanced	Advanced	Advanced	Advanced	Advanced	Intermediate	Degree (NTU)	Immediate
Chen Wei Lin	~\$60,000	8 years	Advanced	Expert	Expert	Limited	Advanced	Advanced	Limited	Degree (NTU)	Immediate
Samuel Tan	~AUD 5,000	3 years	Advanced	Limited	Limited	Expert	Advanced	Limited	Limited	Degree (SING)	Immediate

We have the best mission in the world - helping you stay ahead of the market while streamlining your work process.

We specialize in intelligent content management and business process automation. Our ground-breaking solutions include electronic forms, workflow, form capturing, email archiving, electronic data flow, electronic signature, and mobile solutions that create efficient workflows and shorten time to boost organizational productivity.

Antelope Genie revolutionizes how you manage content, harnessing the power of Generative AI to simplify business processes and optimize resource allocation.

With over 20 years of enterprise business solution history, we live and breathe this fast-paced market. We have acquired the ability to quickly respond to its changing demands and provide trusted consultation on how to fully utilize the features and advanced functionality of your custom system, empower your productivity, and scale your business.

Enterprise workflow and Cutting-Edge AI powered by Antelope – experience digital transformation in all its glory.
